Location: QLD, NSW, VIC, SA, TAS, WA, ACT, NT & NZ.

Service Category: Early Retirement Planning -- Wealth Creation -- Tax Minimisation -- Home-Based

- Business Partner/Investment Opportunity
- Long-Established Business in the Investment Property Market
- A methodology that can produce a well above average income.

As many as 70% of Australians are taking the important step and buying their own home, which becomes the biggest asset they own. Though the value of Australian properties increase over time, it will likely, not be enough for home owners to retire on.

Through education, planning and preparation, we will train you how to guide Australians to move forward in the right direction so they enjoy a quality retirement whilst at the same time you, as a partner, will be earning yourself a well above average income.

With over 40 years' experience in property research and investment, we have gained a unique insight into this booming property investment market. Over this time we have been able to help wise Australians create real wealth and enjoy early retirement.

Property investment is one of few things that Australians need to consider when it comes to a comfortable retirement. They need to take time in organising all different aspects of their retirement plan; including superannuation funds - especially SMSF, tax minimisation, wealth creation and creating financial security for their future.

We have partnered with professional organisations because, they too, boast impeccable reputations that embrace the same commitment to client care as ourselves. We want to introduce our clients to professionals who are going to complement all the efforts we put in initially.

This will ensure that you earn a rewarding high income. You see, it's not only our knowledge of the property market that has taken us to where we are today, but also our commitment to client care. This has contributed immensely to our reputation, which we have steadily built up over so many years.

The company will provide all your initial and ongoing training plus all your Personal Investment Analysis software and stationery loaded on a new laptop. Your required business alliances will be set in place including accountants, financial planners and finance brokers, self-managed superannuation specialists, legal professionals and property management companies. This will ensure that you can confidently go out and make excellent ongoing income for yourself while showing your clients the pathway to a financially secure future.

Educating Australians how to enjoy retirement is not the only benefit to this unique opportunity. You will also be shown how to comfortably earn an executive-level income in excess of \$32,500 monthly even working on a part-time basis. Imagine having the time to spend with your family or friends, the capacity to travel first-class for holidays, buy the latest prestige vehicles and live in the upmarket suburb you have always wanted.

This is a unique opportunity to help everyday people all over the country to secure the financial future they have always wanted whilst also providing the trained partner a secure financial future.
